

SURYANSH SHARMA

SOFTWARE DEVELOPER

TO WHOM IT MAY CONCERN,

I am writing to express my interest in Front End Developer at Coalition Technologies. With extensive experience in developing web/mobile applications and a strong background in HTML, CSS, Javascript, React, Nextjs, React Native, Redux, NodeJS, Express.js, MongoDB, Firebase and AWS, I am eager to bring my skills to your team.

In my recent role, I developed React Native driver management app, which showcases my ability to create scalable and efficient mobile solutions. Here's an overview of my contributions to this project:

Developed an OTP architecture using Symmetric AES algorithm to ensure secure and efficient driver authentication during both onboarding and login processes.

Incorporated Razorpay payment gateway to facilitate daily payments, providing drivers with a seamless and secure financial transaction experience.

Implemented Firebase push notifications to keep drivers updated with important information, including payment confirmations and attendance records.

Here's the github repo for the same:

github.com/suryansh9315/onev-payments-manager

This project not only highlights my technical proficiency in Backend Development and associated technologies but also demonstrates my ability to deliver end-to-end solutions that enhance user experience and operational efficiency.

Thank you for considering my application. I look forward to discussing how my background aligns with the needs of your team.

SINCERELY,

SURYANSH SHARMA
